Netherlands Journal of Agricultural Science

Volume 32 (1984)

Subject index

This index lists the key-words given in the headings of the papers. Figures refer to the first page of papers.

acid rain 159, 161
acidification
—, natural 159
—, soil 161
acoustic impedance 67
acoustics, soil 67
adaptive control 137
aerial part 3
Africa, West 193
African catfish 64
age-hardening 215
aggregates 215
agricultural
— development 167
— research methodology 253
agroforestry 139
air flow resistance, specific 67
air temperature 33
albedo, soil 33
alder 240
allowable cut 242
Alnus glutinosa 240
allocation, research 193
aluminum 73
analysis, soil 322
anthropogenic 161
Aphidius rhopalosiphi 237
Atterberg Limits 215
axillary branching 101
backfat parameters 301
balance
— input-output 161
— technique 301
beach
— nourishment 153
— replenishment 153
—, sandy 153
biological control 237
biomass 240
birth weight 263
blight, head 148
body
— composition 301
— temperature 245
border rows 293
bottom-break 3
breed 59
branching, axillary 101
broadcast fertilization 330
calcareous soils 161
calcium 43
calves, early-weaned 107
carcass composition 301
catfish, African 64
cattle
—, dairy 9, 142
— production 167
cell wall 145
Clarias lazera 64
clay content 205
climate
— control 137
—, greenhouse 137
clustering 237
comparative slaughter technique 301
compensation, yield 293
competition 155, 324
—, root 155
concentrate
— feeding 9
— ingredients 9
conception rate 263
conservation, nature 240
constraints 193
contamination, soil 73
control
—, adaptive 137
—, biological 237
—, climate 137
—, fertility 142
—, temperature 137
cow, see cattle

crop
—density 148
—growth and development 247
—rotation 229
cultural operation 293
cycle, element 159
dairy cattle, dairy cow 9, 142
degradable protein, slowly 107
development 328
digestibility 27, 145, 250
—trial 23
digestible lysine requirement 23
digestion, soil 322
drip loss 245
drying, wetting and 215
dry matter
—content 145
—intake 9
early-weaned calves 107
Eastern Europe 175
Echinochloa crus-galli 324
economic role 175
economics 142
ecosystem, natural 159
element cycle 159
energy 328

epidemiology 61
equilibrium 3
erosion 153
estuary 151
Ethrel 61
Europe, Eastern 175
farming
—systems research 253
—, traditional 81
fat deposition 87
fatness 263
feed
—efficiency 64
—intake 59
feeding 263, 273, 328
—trial 23, 107, 250
fermentation in rumen 9
fertigation 330
fertility 263
—control 142
fertilization, broadcast 330
financial return 139
fish culture, fish farming 64
forage maize 145
forest management 240
—, selective 242
—, small-scale 155
friability 205
fungi, soil 229
fungicide 148, 229
genotype 145
genotype-ration interaction 59
Gerlachia nivalis 148
gilt 57, 87, 263, 281, 328
girth 3
graphical model 155
grass seed 119
grassland 319
—utilization 175
greenhouse climate 137
gross lysine requirement 23
growth
—composition 301
—and development, crop 247
—rate 155
head blight 148
herbage nitrate content 319
Hybrid Tea rose 3
hypomagnesaemia 73
identification 137
ideotype 145
incomplete resistance 61
ingestion, soil 73
input-output balance 161
intake 145
internal concentration 43
juvenile stage 119
Kentucky bluegrass 119
lactic acid, rumen 9
Lactuca sativa L. 330
land use 159
Leslie matrix 242
lettuce 330
Leucaena leucocephala 139
light interception 247
litter size 57, 281
localized supply 43
lysine requirement 107
—, digestible 23
—, gross 23
macrobenthos 153
magnesium availability 73
maize 43, 324
maternal effects 57
meadow grass, smooth-stalked 119
meat quality 245
mellowing 215
metabolizable energy 87
methodology, agricultural research 253
microclimate 81

— management 33
milk production 59
mineral nitrogen, soil 319
